

## STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	page 3, line 49	methods section of
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	page 3, line 55-66	results section of abstract
<b>Introduction</b>				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	page 5, line number 88,89 and 104,105	First and third paragraph in introduction
Objectives	3	State specific objectives, including any prespecified hypotheses	page 4, line 106,107	last paragraph of
<b>Methods</b>				
Study design	4	Present key elements of study design early in the paper	page 6, line 110	first para in methods
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page 6, line 111,112	methods section
Participants	6	(a) <b>Cohort study</b> —Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up <b>Case-control study</b> —Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls <b>Cross-sectional study</b> —Give the eligibility criteria, and the sources and methods of selection of participants	page 6, line 110,111	methods section
		(b) <b>Cohort study</b> —For matched studies, give matching criteria and number of exposed and unexposed <b>Case-control study</b> —For matched studies, give matching criteria and the number of controls per case	n/a( this is just cross sectional study)	n/a( this is just cross sectional study)
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	page 6, line 112	methods section
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	page 6, line 110	methods section
Bias	9	Describe any efforts to address potential sources of bias	page 6, line 110	methods
Study size	10	Explain how the study size was arrived at	page 6, line 110	methods
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	page 6, line 113	methods

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	page 6, line 105 and 106	methods
		(b) Describe any methods used to examine subgroups and interactions	page 6, line 110	methods
		(c) Explain how missing data were addressed	page 6, line 110	methods
		(d) <b>Cohort study</b> —If applicable, explain how loss to follow-up was addressed <b>Case-control study</b> —If applicable, explain how matching of cases and controls was addressed <b>Cross-sectional study</b> —If applicable, describe analytical methods taking account of sampling strategy	page 6, line 113	methods
		(e) Describe any sensitivity analyses	page 6, line 113	methods
<b>Results</b>				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	page 8, line 159	results section , first para
		(b) Give reasons for non-participation at each stage	n/a -( only one stage)	n/a (only one stage in
		(c) Consider use of a flow diagram	n/a( cross sectional single	n/a( cross sectional
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	page 8 , line 161-166	results first and second paragraph
		(b) Indicate number of participants with missing data for each variable of interest	n/a (no missing data)	n/a ( no missing data)
		(c) <b>Cohort study</b> —Summarise follow-up time (eg, average and total amount)	n/a ( cross sectional study	design)
Outcome data	15*	<b>Cohort study</b> —Report numbers of outcome events or summary measures over time	n/a ( cross sectional study)	n/a ( cross sectional study)
		<b>Case-control study</b> —Report numbers in each exposure category, or summary measures of exposure	n/a ( cross sectional study)	n/a ( cross sectional study)
		<b>Cross-sectional study</b> —Report numbers of outcome events or summary measures	page 8&9,line number	results section
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	table 2 and table 3, line number 343 and 353	tables section
		(b) Report category boundaries when continuous variables were categorized	table 2 and table 3, line	tables section
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	n/a (no etiology measured	n/a, no etiology measured
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	n/a ( no sub group analysis	n/a ( no sub group analysis
<b>Discussion</b>				
Key results	18	Summarise key results with reference to study objectives	line 233-252, page 10,11	discussion
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	line 259-261, page 11	conclusion

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	line 257-259, page 11	conclusion
Generalisability	21	Discuss the generalisability (external validity) of the study results	line 251,252, page 11	Discussion last paragraph
<b>Other information</b>				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	page 2, line 32	before abstract

\*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at <http://www.plosmedicine.org/>, Annals of Internal Medicine at <http://www.annals.org/>, and Epidemiology at <http://www.epidem.com/>). Information on the STROBE Initiative is available at [www.strobe-statement.org](http://www.strobe-statement.org).
